

MAN Diesel & Turbo has a vacancy in **Dubai** in the **After Sales** department for the earliest start date

Data Manager

Tasks

- Ensure as built status of localized components in local ERP-system
- Provide and implement all engineering data including but not limited to technical drawings, raw material data, specifications, etc.
- Check and confirm that all data and specification meet the requirements of MDT and are in line with the latest technical design („state of the art“) of the relevant item
- Handle local web tool for spare parts sourcing
- Create spare part interchangeability records (SPIR) including spare part recommendations, especially for localized components.
- Ensure that all cost information is valid when required, no matter where the parts are sourced.
- Improve the data quality to enable a smooth spare part process.
- Ensure that the technical status and configuration of the machine is known at any time
- Create and maintain material masters either in SAP (when available) or in local ERP system for localized components.
- Ensure that material data can be used worldwide by using English as mandatory second language.
- Ensure a proper functional-location-structure in order to link the spare part and machine information to the customer and site information.

Qualifications

- Bachelor degree in Mechanical Engineering or Business Administration
- Strong technical background required, preferably from within the Turbomachinery Industry or gained within a customer environment
- Good communication skills in English (verbal and in writing)
- A team player with good social and intercultural communication skills
- Strong analytical skills, and a high attention to detail and accuracy
- Good experience with SAP and Customer Relationship Management tools.

MAN Diesel & Turbo is the world's leading provider of large-bore diesel engines and turbomachinery for marine and stationary applications. It designs two-stroke and four-stroke engines, gas and steam turbines as well as compressors.

The product range is rounded off by turbochargers, propellers, gas engines and chemical reactors. Customers receive worldwide after-sales services marketed under the MAN PrimeServ brand.

The company employs around 15,000 staff at more than 100 international sites, primarily in Germany, Denmark, France, Switzerland, the Czech Republic, India and China.

MAN Diesel & Turbo is a company in the Power Engineering business area of MAN SE.
